- loc_type
- inventory

vehicle
- license_plate
- make
- model
- year
- vehicle_type
- baseRate
- odometer**
- fuel_used**
- damage**

Relationships: rent_cust, rent_loc, rent_veh, parks
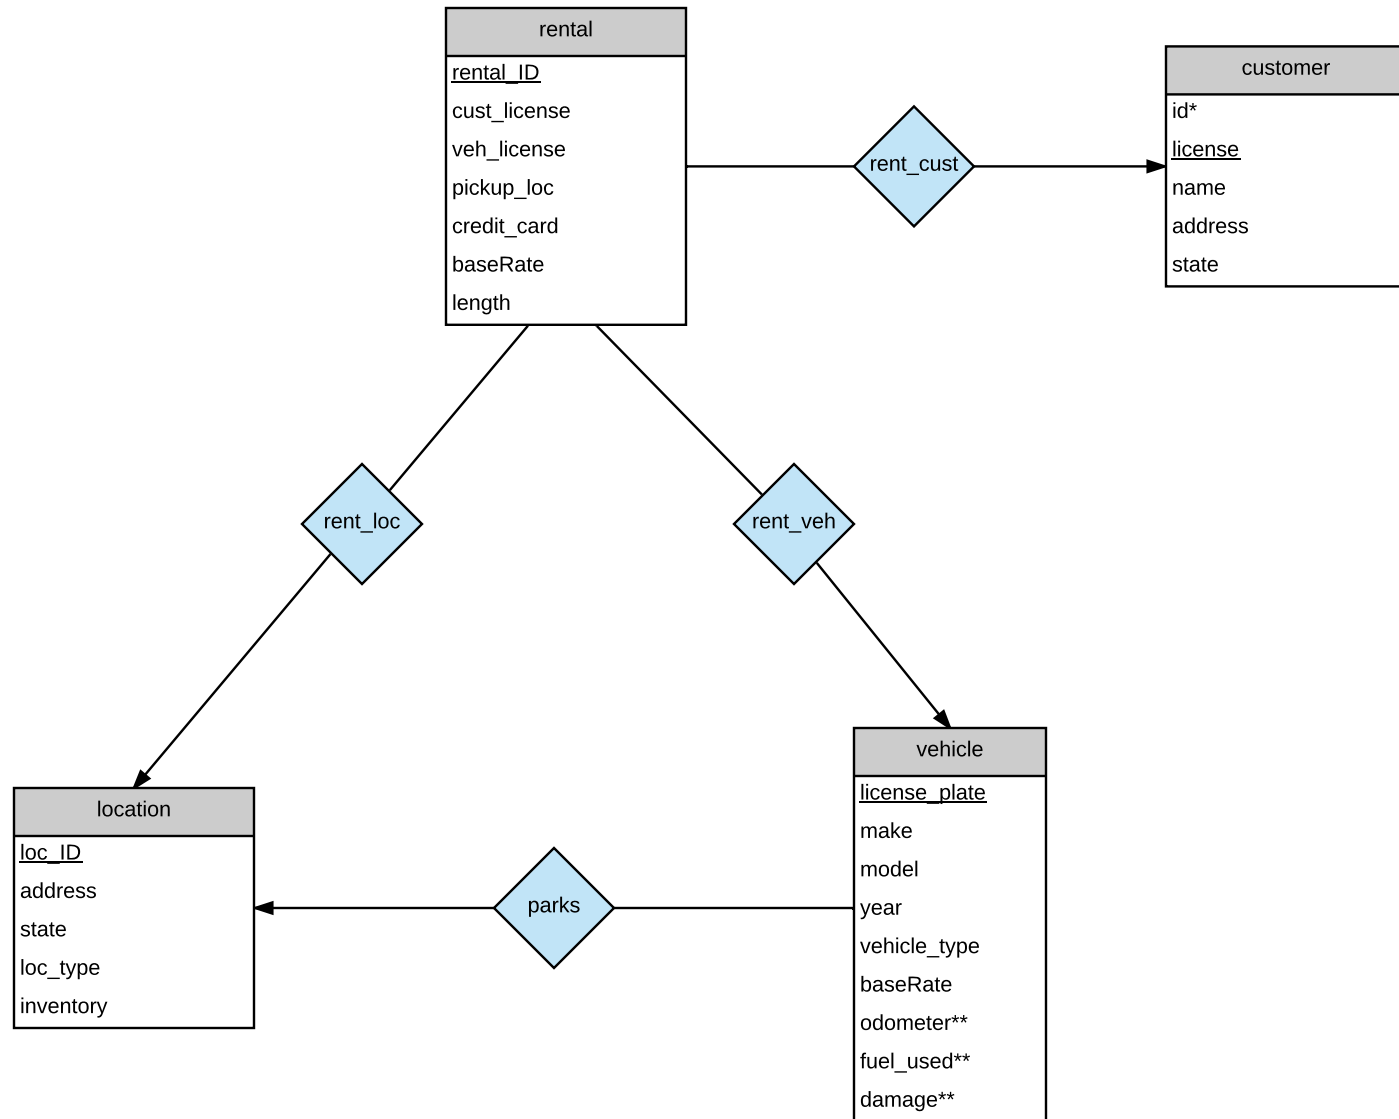

* Though id is part of the relational design, it is immediately dropped. I explain my reasoning for this in my READ_ME, but it concerns data generation

** These attributes were part of my final product, though they are unused.
